Linda Mitchell is a Certified Forensic Document Examiner and Handwriting Expert. To a great extent the work of a document examiner involves the identification or authentication of handwriting; but, there are many other aspects of the profession that can be applied to a document in question. Among them, Linda enjoys deciphering documents containing indented writings, and obliterated content, all of which can be part of a complex multiple-page document examination often found in medical malpractice matters and real estate fraud.

Linda’s laboratory includes up-to-date equipment and a full library of reference resources. She provides informative presentations about most aspects of the field document examination for small or large audiences, and is a competent expert witness. Her current professional research, was published in the Journal of the American Society of Forensic Document Examiners, June 2016, is entitled, *A Blind Study of the Reliability of Hand Printing Identification by the Forensic Document Examiner*. She initiated this study in response to a recent ruling by the 7<sup>th</sup> District Court disallowing testimony because of the lack of meaningful research on the subject. Linda is also a Notary Public, commissioned in the State of California and has also been selected by the Office of the Secretary of State as the examiner for voter fraud for the 2016 election year.

Ms. Mitchell completed her formal apprenticeship in questioned document examination under the direct supervision of Manny Gonzales, who has more than 35 years of professional experience involving most aspects of forensic document examination. (Mr. Gonzales’ CV is available upon request.) Her training conformed to SWGDOG.org guidelines and the Southwestern Association of Forensic Document Examiners (SWAFDE) Training Guidelines (2006) which included training from FBI and Secret Service materials.
